The selling stockholders (which include the underwriter or its affiliates) will receive all of the net proceeds from the sale of the borrowed shares, and the Issuer will not receive any of those proceeds, but the Issuer will receive from the Share Borrower a one-time nominal fee of \$0.01 per share for each newly issued share. The concurrent offering of the borrowed shares is conditioned upon the closing of this offering.

The exact stock price and effective date may not be set forth in the table above, in which case:

- If the stock price is between two stock prices in the table or the effective date is between two effective dates in the table, the number of additional shares by which the conversion rate for the notes will be increased will be determined by a straight-line interpolation between the number of additional shares set forth for the higher and lower stock prices and the earlier and later effective dates, as applicable, based on a 365-day year.
- If the stock price is greater than \$25.00 per share (subject to adjustment in the same manner as the stock prices set forth in the column headings of the table above), no additional shares will be added to the conversion rate of the notes.
- If the stock price is less than \$3.52 per share (subject to adjustment in the same manner as the stock prices set forth in the column headings of the table above), no additional shares will be added to the conversion rate.

Notwithstanding the foregoing, in no event will the conversion rate per \$1,000 principal amount of notes exceed 284.0909 shares of common stock, subject to adjustment in the same manner as the conversion rate as set forth under “Description of Notes—Conversion Rights—Conversion Rate Adjustments” in the preliminary prospectus supplement.
