CYTOCLONAL PHARMACEUTICS INC.  
NOTES TO FINANCIAL STATEMENTS  
September 30, 1999  
(unaudited)

(1) FINANCIAL STATEMENT PRESENTATION

The unaudited financial statements of Cytoclonal Pharmaceuticals Inc., a Delaware corporation (the "Company"), included herein have been prepared in accordance with the rules and regulations promulgated by the Securities and Exchange Commission and, in the opinion of management, reflect all adjustments (consisting only of normal recurring accruals) necessary to present fairly the results of operations for the interim periods presented. Certain information and footnote disclosures normally included in financial statements, prepared in accordance with generally accepted accounting principles, have been condensed or omitted pursuant to such rules and regulations. However, management believes that the disclosures are adequate to make the information presented not misleading. These financial statements and the notes thereto should be read in conjunction with the financial statements and the notes thereto included in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 1998. The results for the interim periods are not necessarily indicative of the results for the full fiscal year.

Through June 1998, the Company was in the development stage and its efforts had been principally devoted to research and development, capital formation and organizational development.

(2) RESEARCH AND COLLABORATIVE AGREEMENT

In June 1998, the Company entered into a license and research agreement with Bristol-Myers Squibb ("BMS") on two technologies related to production of paclitaxel, the active ingredient in BMS's largest selling cancer product, Taxol(R). The agreement includes fees, milestone payments, research and development support and minimum and sales based royalties.

(3) LOSS PER COMMON SHARE

In 1997, the Financial Accounting Standards Board issued Statement No. 128 "Earnings Per Share". Statement No. 128 replaced the calculation of primary and fully diluted earnings per share with basic and diluted earnings per share. Unlike primary earnings per share, basic earnings per share excludes any dilutive effects of option, warrants and convertible securities. Dilutive earnings per share is very similar to the previously reported fully diluted earnings per share. In accordance with Statement No. 128, which was adopted by the Company in 1997, basic and diluted net loss per common share is based on the net loss increased by dividends on preferred stock divided by the weighted average number of common shares outstanding during the year. No effect has been given to outstanding options, warrants or convertible preferred stock in the diluted computation as their effect would be antidilutive.

(4) REVENUE RECOGNITION

Revenue from licensing and research agreements is recognized as the expenses for research and development activities performed under the terms of the agreements are incurred. Revenues from nonrefundable licenses and up front fees are recognized upon signing the agreement. Revenue resulting from the achievement of milestones is recognized when

the milestone is achieved. Amounts received in advance of services to be performed are recorded as deferred revenue.

## ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with, and is qualified in its entirety by, the Financial Statements and the Notes thereto included in this report. This discussion contains certain forward-looking statements that involve substantial risks and uncertainties. When used in this report, the words "anticipate," "believe," "estimate," "expect" and similar expressions as they relate to the Company or its management are intended to identify such forward-looking statements. The Company's actual results, performance or achievements could differ materially from those expressed in, or implied by, these forward-looking statements. Historical operating results are not necessarily indicative of the trends in operating results for any further period.

Cytoclonal Pharmaceuticals Inc., a Delaware corporation (the "Company"), was duly organized and commenced operations in September 1991. To date, the Company's efforts have been principally devoted to research and development activities and organizational efforts, including the development of products for the treatment of cancer and infectious diseases, recruiting its scientific and management personnel and advisors and raising capital.

For the period from July 1, 1999 to September 30, 1999, the Company incurred a net loss of \$1,012,000 compared to a net loss of \$976,000 for the same period in 1998. For the period from January 1, 1999 to September 30, 1999, the Company incurred a net loss of \$2,924,000 compared to a net loss of \$1,935,000 for the same period in 1998. The increase for the nine-month period from the previous year was attributable to an increase in operating expenses and a decrease in revenue and a decrease in interest income. The Company expects to incur additional losses in the foreseeable future.

The Company incurred general and administrative expenses of \$1,828,000 and \$1,930,000 for the nine months ended September 1999 and September 1998, respectively. The increase from the previous year was attributable to increased expenditures for travel and lodging, consulting fees, rent, and taxes, partially offset by a decrease in legal and professional expenses and public and financial relations expenses.

The Company incurred research and development expenses of \$2,022,000 and \$1,173,000 for the nine months ended September 1999 and September 1998, respectively. The increase was attributable to a large extent to a non-recurring expense for the acquisition of the Quantum Core Technology(TM) for drug design and for research activities in Israel. Additionally, the increase was attributable to funding for the research programs at Research & Development Institute, Inc. (RDI), Washington State University and the University of Texas at Dallas, as well as, an increase in laboratory rental expenses, an increase in contract labor costs, an increase in laboratory supplies, and an increase in research salaries and payroll taxes. Included in research and development expenses for the nine months ended September 1999 was a non-cash charge of \$346,000 relating to the valuations of common stock and options issued in connection with services rendered in identifying and securing the drug design technology.

The Company believes that it has sufficient capital to finance the Company's plan of operation in excess of 12 months. However, there can be no assurances that the Company will generate sufficient revenues, if any, to fund its operations after such period or that any required financings will be available, through bank borrowings, debt or equity offerings, or otherwise, on acceptable terms or at all.
